

# MAXMORTER<sup>®</sup>

## **SPECIAL CEMENT BASE CONCENTRATE FOR MAKING ADHESIVE MORTARS IN THICK LAYER**

### **DESCRIPTION**

MAXMORTER is a specially formulated cement and additive base which when mixed with the suitable sand produces an adhesive mortar for fixing interior tiles without the need of applying a levelling render beforehand.

### **APPLICATION**

- Over even or uneven surfaces does not require prior levelling.
- For setting mosaics, floor and wall tiles, ceramics, paving tiles in thicker applications.
- Interior use.

### **ADVANTAGES**

- Formulated with suitable wetting agents, does not require prewetting of surfaces.
- Easy to use.
- Excellent adhesion.
- Thixotropic reaction and superior elasticity provide excellent performance.
- Non-Shrink, no hairline cracking in thicker applications.

### **MIXING**

Mix one (1) part of MAXMORTER with four (4) parts of sand using sufficient water to obtain a smooth mortar mix.

Sand must be free of dust and clay and of varied granule distribution of between 0 to 3 mm. Do not use uniform or fine sand.

### **COVERAGE**

Depending on the surface it levels, approximately 4 kg/m<sup>2</sup> of MAXMORTER per 10 mm. layer.

### **PACKAGING**

20 kg. sacks.

### **STORAGE**

Shelf life of unopened sacks in dry covered storage is 12 months.
